

Sustainability in Danish (organic) agriculture

Erik Fog and
Ole Bloch Engellyst
STOAS Course 1
November 29-30 2012

Sustainability focus in Danish organic agriculture

- Climate Action plans and Climate Catalogue
 - Farm assessment of climate gas emissions
 - Catalogue on possible and practicable actions
- MultiTrust project
 - Clarifying the best ways of assessing and communicating the abilities organic production has to deliver public goods.
 - Evaluating assessment tools
 - Reactions from farmers, industries, consumers and administration.

Projektet er støttet af Promilleafgiftsfonden for landbrug samt
