

Summery of decisions – BufferTech Project meeting

Christiansfeld - March 8th 2016

List of participants: Peter Fjordside Linde, Sara Egemose, Tommy Dalsgaard, Martina Skjellerudsveen, Irene Asta Wiborg, Brian Kronvang, Sebastian Piet Zacho, Kennet Chr. Uggeldahl, Gitte Holton Rubæk, Goswin Johann Heckrath, Søren Bøye Olsen, Carl Christian Hoffmann, Lene Moth, Asger Kristensen, Flemming Gertz, Sandra Hille, Søren Søndergaard, Dominik Zak and Brit Dalby

- Please send the names and presentations of the master students to Sebastian Zacho with cc to Brian Kronvang as Brian Kronvang needs it for project state reporting. He also needs a list on Post Docs.
- Budget part. Each partner asks their economic controller about the project budget and hand it to Brian Kronvang – deadline now. As the reporting is March 31.
- We should seek support for establishing a new IBZ facility near Sillerup. Demonstration site that are prepared for monitoring would be a good choice. Need to seek funding. GUDP or MUDP (want private money as co-finance). Brian sends an application for the Innovation Fund in order to get the 100.000 kr. which BufferTech has saved from the initial application. Funding should go to a private company that can assist in establishing the IBZ with collaboration of a local farmer.
- Intelligent Bufferzoner is mentioned in the “Landbrugspakke” – should be a news for the homepage and newsletter.
- Leaflet targeted farmer and the minister with results and information on intelligent buffezones needs to be produced – Sebastian and Irene will make a first draft together with Brian and relevant WP-leaders.
- Important to show Minister the IBZ when he visits the Norsminde area. Irene will take contact to Helge Kjær Sørensen, DLMØ, to make sure it's on the agenda.
-
- Flemming Gertz ensures a good relationship with Johan from Fillerup before meeting with the Minister.
- Meetings: Advisory board meeting in Sweden/Sealand this autumn (September/October).
- Next project meeting could be in Aberdeen, Scotland visiting Marc Stutter
- Work Package 4 would plan for a meeting in the spring discussing details on experiments with bromide in another location.
- Package 5 would plan for meeting regarding the overlap with Martina's master thesis. Will be arranged between submission and her defense.

Newsletter input

WP 1:

Sandra and Gitte: Soil chemistry in buffer zones (autumn).

WP2:

Sandra and Mette: Enhancing biodiversity in bufferzones topsoil removal and seeding (autumn).

WP3:

Goswin: Placing of bufferzones in the landscape – how should it be done (March).
