

WP 6

- Communication deliverables and future aims
- Newsletter – agreement on topics and **deadlines** ☠
- Følgegruppemøde in Copenhagen
- Project Meeting in Scotland

Project Meeting

Odder, 4 October

Sebastian Zacho & Irene Wiborg, SEGES

Communication deliverables and future aims

Achieved:

- Newsletter in March
- Drone video from IBZ in Spjald (with and without speak)
- Leaflet in Danish and English
- Updating website with news

To come:

- Newsletter in October
- Article in LandbrugsAvisen and LandbrugsInfo regarding effect, funding for more pilot areas and governmental approval
- On location video and article when IBZ in Southern Jutland is being established

Communication achievement of the year!

Newsletter - topics and deadlines ☠

Agreed upon topics:

- WP2. Sandra & Mette with enhancing biodiversity in bufferzones topsoil and seeding
- WP5. Kennet with results from interview
- Input on more topics for the autumn newsletter and spring newsletter
- Work shops or conferences of relevance?
- News or articles for website? Presentation of students?

Følgegruppemøde in Copenhagen

- Ensuring representation from agencies (NAER & Miljøstyrelsen)
- Invitation of more relevant agency people? And who? Signe Anton or Signe Krarup (departementet), SVANA
- Emphasize on:
 - Results
 - Governmental approval incl. money for full scale test
 - Implementation obstacles (case from South Jutland)
- Agenda agreement (next slide)

Følgegruppemøde in Copenhagen continued

1. Kort nyt fra BufferTech projektet. Irene og Brian.
2. Funktion af intelligente randzoner N & P. Henning dækker P og CCH/Brian dækker N.
3. Kortlægning af jorderosion og randzoners betydning v/Goswin og Søren
4. Randzoner – overvejelser/ drøftelser om planlægningsværktøj lokalt og centralt v/Søren
5. Diskussion om implementering. Brian.

Project Meeting in Scotland

Host: Marc Stutter, James Hutton, Dundee

When: 2 days in the week 13th-17th March 2017 (could have arrival the night before, or into the morning of the meeting, then depart after lunch on the second day).

What to see: The Buffertech field site on a farm platform site about 5 km from Dundee Institute. Also other things to see at the farm and also, for those with soil-plant-agronomic interests, a number of practical things to see at the Institute site also (also on a farm and with the glasshouse and lab facilities etc).

Travel by plane to Edinburgh. Dundee can be readily reached by train (just over one hour) or we could arrange/coordinate transport for group arrivals by vehicle maybe.

- Who should/ would like to attend?
- Things we would like to discuss in Scotland?
- Other people we would like to meet?
- Practical matters?
