WaterCAP-Taskforce

WaterCAP-Taskforce accumulates knowledge and experience on water and climate change adaptation from many countries and multiple sectors in the North Sea Region. The knowledge and experience is gained through the former InterReg projects dealing with Water and climate change.

The WaterCAP-Taskforce partnership will be a comprehensive knowledge base for the North Sea Region (NSR) and made available to stakeholders through the transnational taskforce. The project aims to supply water solutions in the NSR and to define ideas for projects in the InterReg V programmes.

Newsletter from WaterCAP-Taskforce

The demand for MTTF visits has been high. The Taskforce has already had three successful visits during the last two months dealing with the handling of nitrate in farmed areas, groundwater and river catchments. In this newsletter you will be able to read more in depth about some of the visits.

[Read the newsletter here.](#)

Utilize and control the amount of organic manure and nitrogen

In Lower Saxony and Denmark, drinking water comes from ground water. Farm management can, depending on how the drinking water is protected by the soil layers, have a major impact on the quality of the drinking water

The screenshot shows the LinkedIn interface for the WaterCAP-Taskforce group. At the top, there is a navigation bar with the LinkedIn logo, a search bar for groups, and menu items for Home, Profile, Connections, Jobs, and Interests. Below this is a banner for the group with the WaterCAP Taskforce logo and the text "WaterCAP-Taskforce". Navigation tabs for Discussions, Promotions, Jobs, Members, Search, and Manage are visible. A large banner image features the text "WaterCAP Taskforce" with a stylized blue wave and a water drop graphic. Below the banner is a section for "Your Activity" with a profile picture of Marianne Greve Rasmussen and a text input field for starting a discussion. The main content area shows a post by Marianne Greve Rasmussen, Communications Coordinator at Crop Production at The Knowledge Centre for Agriculture, DAAS. The post title is "Latest fact sheets from WaterCAP-Taskforce on www.watercaptaskforce.eu/factsheets". The post content includes: "Shift to a catchment based approach & Groundwater protection, nitrate leaching and farm management". The post has 1 like and 1 comment. A comment by Irene Wiborg is visible, stating: "Interesting to see how good ideas can be shared across different countries. we look forwar using the good ideas from Germany and UK in ... 2 months ago". There is a text input field for adding a comment.
