Programme**

The challenge and the goal

- 💧 The implementation of directives like the WFD is a challenging task – going from planning to action with real improvements is not easy...
- 💧 Especially when we want to secure room for continued development of agriculture and fulfillment of other goals at the same time
- 💧 We want to find the win-win's – and with real effects 😊

UK and Denmark

💧 So different

💧 But

Denmark – a tested idea

Denmark – next steps....

- 💧 We don't know
- 💧 Perhaps a continued general regulation
- 💧 But hopefully a new model

Denmark – the dream

Common challenge

- 💧 Need for a good balance between the top and the bottom
- 💧 Need for a real and a broad engagement in the "bottom"
- 💧 Need for an intermediary
- 💧 Need for room to find win-win's
- 💧 Need for more action and not just plans!

Thanks to the Rivers Trust

- 💧 For showing how to engage people locally
- 💧 For showing our Environmental Ministry and other central actors in Denmark that your Catchment Based Approach can be a way to implement directives like the WFD
