Agenda for a project development day in Gent

Aim: To develop projects and find new partners. Additional the aim is to explore themes that could be relevant for a cluster project which could be incorporated from the beginning.

Morning:

Welcome and introduction of the days (½ hour)

A process tool in advance could be to walk around among the participants and when decided stop and talk to the nearest person about the main passions regarding water and EU at the moment?

1. General introduction to the programme (Carolien..) (½ hour)
    a. Deliver main text in a summary version for the participants

2. On basis of the handed in project ideas divide the group into three smaller groups (1 hour):
    a. How does the single project target the programme text?
    b. Which key words in the programme does the project target?

3. Plenary. Report back on the discussions and bring the key words and explain why they are selected (½ hour).

4. Lunch

Afternoon:

5. Concrete work on single project level. What can be targeted in the project and what goes to the Umbrella/CAP/HUB?

6. Plenary: Discussion on each project and general themes. Through the day we produce a matrix around generic themes like we did in WaterCAP (see below).

Project	Common issues (all projects)			Common issues (>50 %)			
	Impact analysis	Adaptation strategy	Water quantity aspects/flood risk	Policy regulations + guidelines	Agriculture	Urban water	Water quality
CPA	X	X	X	X	X		
Aquarius	X	X	X	X	X		X
CLIWAT	X	X	X	X	X	X	X
SAWA	X	X	X			X	
DiPol	X	X	X			X	X
C2CI (water)	X	X	X	X		X	X
