LOKAL FORANKRING I VANDOMRÅDEPLANER

- EU projekt: *Water Co-Governance for sustainable ecosystems* (WaterCoG)
- *The projects' output aims for a change in working practice that will improve the integration between top-down implementation of European and national directives and bottom-up, participatory developed solutions for improving the quality and sustainable management strategies of NSR ecosystems.*
- Danmark: KL, Limfjordssekretariatet, SEGES

SEGES

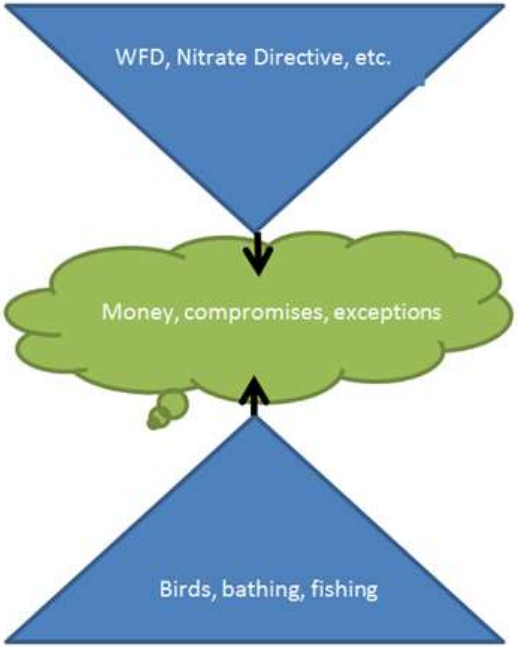
- Landbruget
- Grønne org.

Sammentænkning

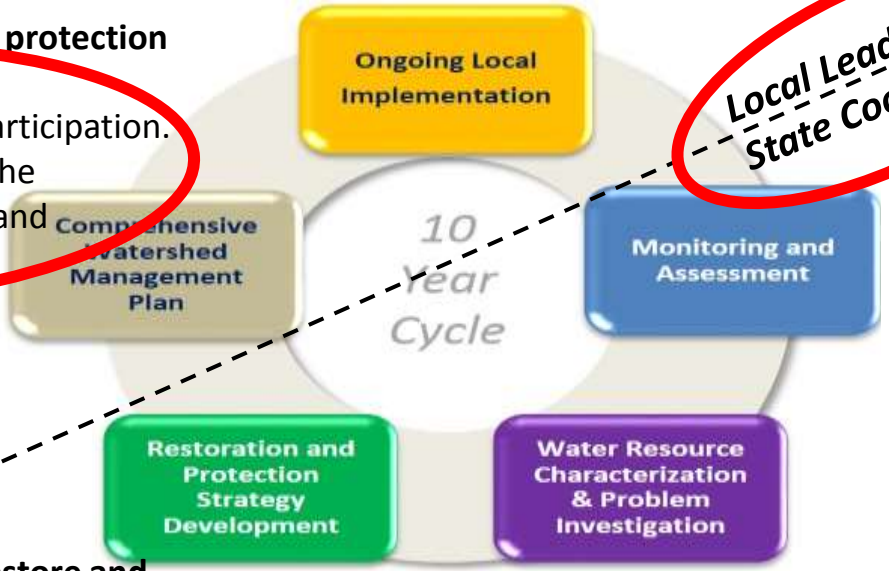


MN Water Management Framework

"Watershed Restoration and Protection Strategy (WRAPS)"

Step 4. Conduct restoration and protection projects in the watershed
- Civic engagement and public participation.
- Prioritize, target and measure the implementation of restoration and protection projects.

Outcomes:
- Local Water Plans
- One Watershed One Plan



Local Leadership
State Coordination

Step 1. Monitor water bodies and collect data
- Two-year intensive water monitoring to identify impairments (lakes & streams)

Step 2. Assess the data
- Identify impaired waters (*do not meet standards*).
- Identify stressors affecting aquatic life.
- Analyze data with water quality models and maps.

Step 3. Develop strategies to restore and protect the watershed's water bodies
- Summarize details on water quality issues.
- Determine reduction goals for impaired or protected water bodies.

VELKOMMEN !
