

EVALUATION – concerning the task of cleaning milk tanks

You have now worked two weeks with the new milk tank set-up, and we would really appreciate it, if Mihai and Camilla would both fill in this questionnaire.

You just tick yes or no, and we hope you will also write more comments below.

Please return the completed questionnaire to hbd@seges.dk before 01.12.17 – Thank you☺

		Yes	No
1	Do you use safety glasses more frequently than before?		
2	Do you use gloves more frequently than before?		
3	Has it been easier to change gloves more frequently?		
4	Do you have better working postures than before – a less stooped posture when handling cans?		
5	Do you experience less waste of chemistry when pouring it from the can to the measuring cup?		
6	Is it faster to perform the task than before?		
7	Has handing over the task to a colleague/substitute become easier than before?		
8	Are you more confident about handing over the task now than earlier?		
9	Do you think there will be fewer accidents (such as skin etching or splashing in the eyes)?		
10	Has it become easier to perform the task correctly? (and reduced the risk of mistakes eg when colleagues/substitutes have to perform the task)		
11	Have you been more focused on safety than before when cleaning the milk tanks?		
12	Have you been more focused on safety when performing other tasks?		
13	Would you recommend others to implement similar initiatives?
