2 - Veterinary doctor. I was working on a pig farm in Ukraine, Russia. I have been working in DK for 4 years on a different pig farms. And I am working now on a Top DB-tjek farm (last year - 1st place)

3 - Set up your focus on the farm as like setting up focus on your photo camera. One main focus for every week in farrowing barn. I have made a checklist system for every week. So you can use this checklists like a pilots, before their start the flight, during the flight, and before landing. Below you will see brief and short version of it.

#before week 0 - ZOOM-ZOOM-ZOOM - equipment

As soon as your barn dry, after high pressure washing, you need to check all your equipment.

Checklists: lamps, nipples and their flow rate, drinkers and their flow rate, floor damages etc.

#week 0 - ZOOM-ZOOM-ZOOM - sow

As soon as you have moved the sow, before their farrow, you need to understand each sow and give what it needs.

Checklists: appetite, sows temperature, sows with special condition (beer + extra water), sows with a bad farrowing history etc.

#week 1 - ZOOM-ZOOM-ZOOM - piglets

As soon as their start to farrow, you need to understand each piglets and give what it needs VIP (Very important piglets).

Checklists: help to find the teats, split milking, to create a good family for each individual pig, full belly test etc.

#week 2 - ZOOM-ZOOM-ZOOM - feeding curve

As soon as their finish to farrow, you need to understand each sow necessities and give what it needs.

Checklists: evaluation by the size of the sow, evaluation by the litter size, evaluation by the quality of piglets, try to get her maximum by the end of the week etc.

#week 3 - ZOOM-ZOOM-ZOOM - creep feeding

As soon as the sow starting to drop in milk production, you need to understand each individual litter necessities and give what it needs.

Checklists: «little and often» rule, creep feed at the same time when the sow gets her morning feed, creep feed at the same time when the sow gets her evening feed, extra feed for a litter with strong appetite etc.

#week 4 - ZOOM-ZOOM-ZOOM - sow preparation for insemination

As soon as piglets are ready for weaning, you need to understand each individual sow necessities for a better performance in insemination unit and give what it needs.

Checklists: sow evaluation by the farrowing history, one hand of straw for each sow, extra care for a sow with a special condition, extra water for each sow etc.

When everything is important than nothing is important.

Set up your focus. ZOOM-ZOOM-ZOOM and may the force of checklists be with you

4 -

a) I expect to get

4-5% mortality reduction on a farm with a high mortality rate.

2-3% mortality reduction on a farm with a mid mortality rate.

1-2% mortality reduction on a farm with a low mortality rate.

b) It's easy to control with additional checklists system

c) You can expect after a first fiscal quarter

d) Agrosoft week management is more than enough to see difference

e) There is no any additional cost to assess, benefits you can simply assess by AgroSoft

f) Simply can be made individually in excel depends on the specific farm economy and production results

5 -

What is the motivation of a person with a poor vision to wear glasses? The same motivation will be here when they start to use it.

My focus-concept is like these glasses.

6 - I can demonstrate my idea on any farm. I can't see any reason to demonstrate it on my own farm, because our farm is the best in DK. Last year first place by DB-tjek. Last 3 years stayed in the top five by DB-tjek.

YES I agree to share my experiences and knowledge on social media websites and in articles as well as for the documentation of the project

YES I understand that photographs and video recording of me and my business is exposed in various media I understand that I do not receive payment for my contribution to the project by sharing experiences video etc. as mentioned above, and that SEGES have the right to use the material free of charge to the dissemination of knowledge, regardless form.

YES I agree that any agreements and honor call of the advisers I used in the project is done by SEGES

NO I cant participate in the lion's den March 28 2017 if I am one of the selected. In the end of the March I will fly to Thailand in order to explore swine production in Chiang Mai and Chiang Rai provinces.

YES I can participate in pig Congress in 2017 - 24 and 25 October 2017 in Herning.
