## Dag 3 (4<sup>th</sup> may)

8.30 Wetland Field day. Bus pick up at First Hotel. Visiting 2 wetlands and teaching in the bus  
 12.00 Lunch in field  
 14.00 Back at hotel. End of program

## **Further explanation for Session 1**

### **Pilot updates based on implementation diagram**

Aim of this session is to get updates from pilots in plenum

It is a follow up from the Varberg meeting where we first time presented pilots using the implementation concept developed in wp5.

We do not have time for presentation all 16 pilots, so each country has to decide what they want to present within the given time.

Please be aware - We do not want just another pilot description!

At the Varberg meeting we used implementation concept diagrams to describe baseline and goals for the work. At this meeting, we want an update on status. Where your activities in WaterCoG have brought between baseline and goal.

25 min for each country including discussion and comments. Do not use all 25 min on presentation.

We like to have updates on success and troubles/dilemmas

Please use triangle diagrams to illustrate

## Close by attractions

**Walk along the waterfront – at the hotel**

**Harbor bath** – 400 meter from hotel. Sea water bath

**Utzon Center** (Architect of Sydney Opera house) – next to hotel

**Down town city and walk in park – next to hotel**
