WP3 workshop session
November 13, 2020 and November 18, 2020
9:00-12:00 CET

Date/Time	Program
Workshop 1 Friday, November 13 9:00 - 12:00 CET 15 minutes break after first three presentations	## From control to management – doing the right thing at the right place. Supporting farmers, water advisors and authorities in optimizing location and selection of mitigation measures. Facilitator: Ainis Lagzdins (LLU) • Accessibility of information and catalogue of measures (Katarina Kyllmar, SLU) • Development of the existing national catalogue of measures – Swedish example (Janne Pettersson, the Swedish Water Authority) • Using digital maps and data for complex decision making at different scales (Mats Söderström, SLU) • Engagement of farmers in developing agri-environmental schemes (Emma Svensson, SBA) • Adapting spatial planning methods to catchment level water management and risk mitigation by utilizing thematic maps (Sirkka Tattari, SYKE) • Buffer zones and controlled drainage – two measures used in Finnish agri-environmental programme (Jaana Uusi-Kämppä, LUKE) • Conclusions
Workshop 2 Wednesday, November 18 9:00 - 12:00 CET 15 minutes break after first three presentations	## From farm level to catchment level – spatial planning for holistic water management. Supporting rural communities and authorities with smart methods and tools for spatial water planning. Facilitator: Ainis Lagzdins (LLU) • Optimization of the landscape structure for regulation of water cycle – introduction to spatial planning (Kinga Krauze, ERCE) • Establishment of a two-stage ditch and how we assess impact on water quality with continuous on-line devices (Sari Väisänen, SYKE) • Tools for optimizing the best locations for wetlands (Jari Koskiaho, SYKE) • Spatial planning toolbox – solutions that can be used at various levels of planning (Malgorzata Grodzicka-Kowaczyk, PhenoHorizon) • Spatial planning in agricultural landscapes of Västervik municipality by using of local data and VISS (Water Information System Sweden) Gun Lindberg, the Västervik Municipality) • Information systems and models to assist in river basin management planning and reporting in Finland (Juha Riihimäki, Kati Martinmäki-Aulaskari, Jari Koskiaho, Sirkka Tattari and Lasse Järvenpää, SYKE) • Conclusions

STØTTET AF

Promilleafgiftsfonden for landbrug
