Kvælstof- og fosfortransport på månedsniveau

I dette notat findes grafer for kvælstof- og fosforudledningen til vandmiljøet på månedsbasis fra 1990 til 2018. Disse er vist på deloplandsniveau, det såkaldte farvand4 niveau. Hvert delopland er identificeret ved et nummer, og nummeret kan findes i kortmaterialet herunder. Data er stillet til rådighed af Aarhus Universitet - DCE. For hvert opland er vist:

TN hele oplandet: Total kvælstof udledning i både målt og umålt opland. Alle bidrag.

TN umålt opland: DK-QNP modelleret total kvælstof udledning i umålt opland. Alle bidrag.

TN målt opland: Målt total kvælstof udledning i målt og umålt opland. Alle bidrag.

TN diffus hele opland: Den total kvælstof udledning i målt og umålt opland. Kun diffust bidrag dvs. fra landarealer og spredt bebyggelse

TN punktkilder samlet: TN fra punktkilder der udleder til vandløb og direkte til havet. Både målt og modelleret.

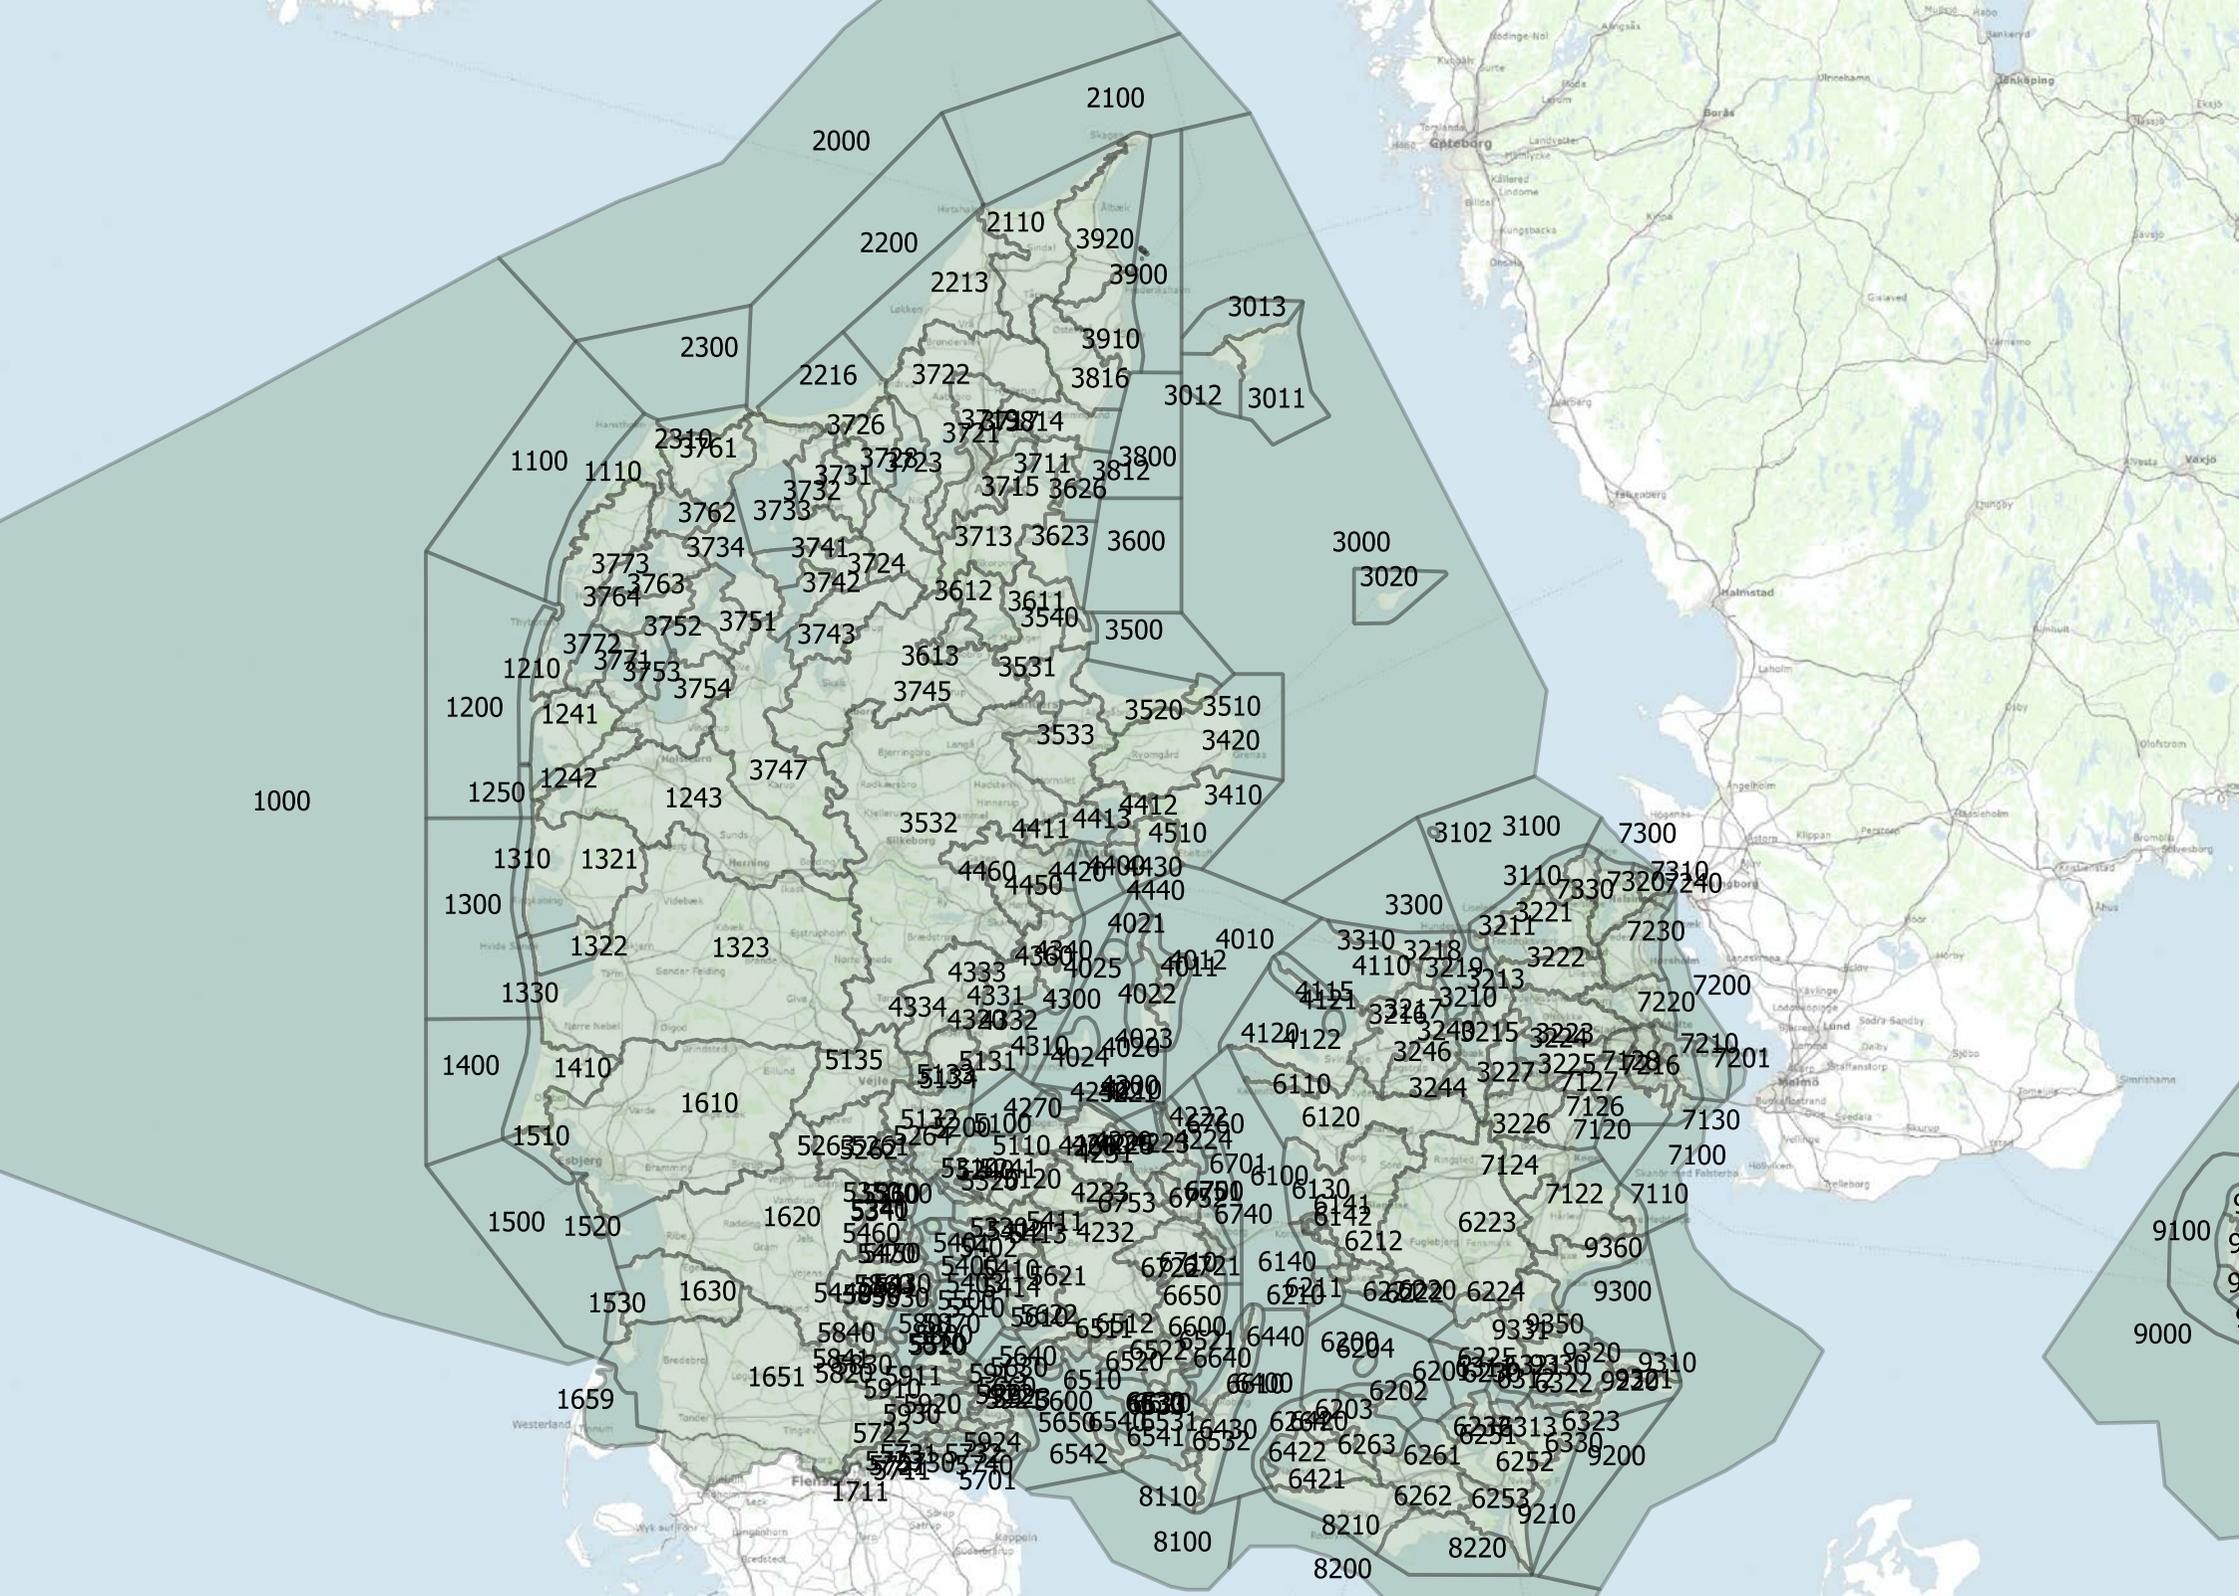

TP hele oplandet: Total fosfor udledning i både målt og umålt opland. Alle bidrag.

TP umålt opland: DK-QNP modelleret total fosfor udledning i umålt opland. Alle bidrag.

TP målt opland: Målt total fosfor udledning i målt og umålt opland. Alle bidrag.

TP diffus hele opland: Den total fosfor udledning i målt og umålt opland. Kun diffust bidrag dvs. fra landarealer og spredt bebyggelse

TP punktkilder samlet: TP fra punktkilder der udleder til vandløb og direkte til havet. Både målt og modelleret.
