

Promilleafgiftsfonden for landbrug

Bilagsfortegnelse

1. Oversigt over datadækningen for de fleste stationer med profilmålinger og vandkemi i Skive Fjord og tilstødende områder for perioden mellem 1990 og 2017. Cirklerne angiver CTD-profiler, mens krydser viser vandkemiske data.
2. Profilmålinger og vandkemiske data fra en lang række stationer opdelt efter dels perioder af 3-7 dages varighed i 2003, dels forskellige områder. Stationsnavnene svarer til de betegnelser som er anvendt i Overfladevandsdatabasen ODA, hvorfra data er hentet. Endvidere vises tidsserier af to ugers varighed omkring tidspunkterne for profilmålingerne af vindens fart (tynd linie) og retning (tyk linie), vindens fart opløftet til tredje potens, som er et indirekte mål for den blandingsenergi, som vinden leverer, samt afstrømningen fra oplandet af ferskvand og total-N (tynd linie) og total-P (tyk linie). Vinddata er leveret af Danmarks Meteorologiske Institut, mens data vedrørende afstrømningen er leveret af Aarhus Universitet.
3. Tidsserier af overflade- og bundværdier (hhv. tynde og tykke linier) for saltholdigheden (øverst) samt koncentrationerne af ilt (næstøverst), ammonium plus ammoniak (i midten), nitrit plus nitrat (næstnederst) og orthophosphat (nederst) på stationerne 93740007 (Skive Fjord), 93740011 (Lovns Bredning) og 93740004 (Risgårde Bredning) for to lange perioder i 2003-4.
