

Baltic Sea Regional On-line Conference on Water Management in Agricultural Landscapes

Workshop No. 4

Catalogue of measures - supporting multiple ecosystem services

November 9th 12:30-14:30 (CET) on Zoom

INVITATION and PROGRAM

Register for the workshop:

https://zoom.us/webinar/register/WN_2UPRI9g_Qc2DS2UOspO1jw

Within Waterdrive, partners from all countries around the Baltic Sea work to share knowledge and experiences about agricultural water management. The Catalogue of measures is a website produced within the project where a selection of agri-environmental measures used in participating countries are described. The measures are presented both shortly for a quick overview and more detailed including links to other sources, videos etc. An attempt to classify the measures according to multi-functionality is also included.

The purpose with the workshop is to show the Catalogue and some of the measures included. We also want to discuss how to achieve better knowledge on the functioning and efficiency of measures in different agricultural landscape types and for support of multiple ecosystem services.

Welcome to participate!

PROGRAM

Introduction - the Catalogue and need for information on measures

Katarina Kyllmar, Swedish University of Agricultural Sciences (SLU), Sweden

Gypsum amendment for reduced erosion and losses of phosphorus

Pasi Valkama, Finnish Environment Institute (SYKE), Finland

In-furrow subsoil application of liquid organic fertiliser under pressure

Eduard Vasilev, Federal Scientific Agriengineering Centre VIM, St. Petersburg, Russia.

On-farm treatment of storm water in subsurface flow constructed wetlands

Linda Grinberga, Latvia University of Life Science and Technologies (LLU), Latvia

Buffer zones along water courses

Jaana Uusi-Kämpä, Natural Resources Institute Finland (LUKE), Finland

Discussions in Break out rooms (10 min)

Subsidy system for reclamation and restoration of agricultural land

Irina Popova, Administration of Gurievsk city district, Kaliningrad region, Russia

Digital methods for agricultural monitoring and nutrient load management

Ekaterina Shalavina, Federal Scientific Agriengineering Centre VIM, St. Petersburg, Russia

The Danish Catalogue of measures

Frank Bondgaard, SEGES, Denmark

Discussion

Moderated by Ainis Lagzdīņš, Latvia University of Life Science and Technologies (LLU), Latvia
