Access Code: 503353

Implementing sustainable management for surface water and groundwater resources needs broad support from stakeholder groups including citizens. The [WaterCoG project](#) implemented a number of pilots which analysed first the governance baseline, before developing tailor-made co-governance approaches using (online) tools for stakeholder involvement.

A central challenge in co-governance has been to integrate and to monitor a vast amount of data. Stakeholders acknowledge the need for information and expert knowledge.

Aim of Online Workshop

In this workshop we would like to share our experience on using tools in stakeholder involvement and learn also from other projects in the North Sea programme. Some are already included in the agenda (see next page) - if you are interested in sharing your tool, please let us know.

We invite water managers from the North Sea Region to exchange and inspire own tools and approaches by learning from others' challenges or successes.

We would like also to identify open questions and explore opportunities for networking and future projects- also because the upcoming INTERREG VIB North Sea programme includes a new priority "Better Governance" as well as Priority on "Climate resilient North Sea Region".

For **registration** please contact

Ilke Borowski-Maaser, INTERESSEN IM FLUSS; phone: +49/(0)511/21 24 16 88 or bm@interessen-im-fluss.de

For any other information, please contact

Silke Mollenhauer, OOWV mobile: +49/(0)171-910 17 22 or mollenhauer@oowv.de

Acknowledgement

WaterCoG is supported by the North Sea Programme of the European Regional Development Fund of the European Union. The five-year project brings together nine partners from Sweden, Germany, Denmark, the Netherlands and UK in a consortium led by The Rivers Trust. We would like to thank the Interreg VB North Sea Region Programme for funding.

Agenda (Version of 5th September 2021)

Interreg
North Sea Region
WaterCoG
European Regional Development Fund

8.30	Arrival
9.15	Welcome & Warming Up- Networking
	WaterCoG: Presentation of the Baseline report, Pilots and Synthesis - How we implemented co-governance approaches for sustainable water management (Barry Bendal, The Rivers Trust)
	Session: Local Stakeholder Involvement and Capacity Building
	WaterCoG (Sweden): Riverwalks and other examples for easy accessible interconnection between stakeholders Björn Lagerdahl, Vattenmyndigheten Västerhavet)
	WaterCoG: Water councils at Work - River basin management plans Niels Philip Jensen, KL
10.30	BREAK
	BUILDING WITH NATURE: Stakeholder mapping and the role of the Trusted Intermediary – lessons from <i>Building with Nature</i> in Scotland. Chris Spray, University of Dundee.
	Discussion
	Session: Capacity Building for the incoming generation of water managers
	FRAMES: Serious gaming – tool for strategic planning and training for crisis situations and education (FRAMES case study), Kaija Jumppanen Andersen, Miljøministeriet
	Climate Café / Citizen Science. Floris Boogaard, Hanze Hogeschool
	WaterCoG: Who owns our groundwater? – Educational programme for teenagers in times of Covid19. Silke Mollenhauer, OOWV
	STAR2Cs: The Adaptation Catalyst E-Tools for visualising different possible futures. Christine Wissink, Kent University
	Discussion
12.00-12.45	BREAK
12.45	Session: How can GIS based tools contribute to process and communicate scientific data for stakeholder processes?
	Using GIS-Tools for more cooperative nutrient management: Kollektor, Nitrate App and Drain Filter Platform in Denmark. Sebastian Zacho, SEGES
	CATCH ArcGIS Story Maps for communicating extreme precipitation threats. Julia Oberdörffer, OOWV
	WaterCoG GIS Storymap for one of the UK areas (River Wensum), Jessie Leach, The Rivers Trust
	Discussion
13.30	Session: Better Governance in Water Management- What else do we need? Discussion on further developing open questions and project ideas for the upcoming
